PETROLEUM LIFTING SERVICES

CERTIFICATE OF TEST AND THOROUGH EXAMINATION FOR TOWER CRANE

CERT NO : WQGIE-1124-41/3		LOCATION : ALEXANDRIA
1. Name and Address of Owner of Crane		GIECO
2. Name and origin of Manufacturer of Crane		SIMMA
3. Type of Crane and Nature of Power (e.g. Scotch Derrick , Manual, Electric, Tower, Rail Mounted etc.)		SIMMA RAIL MOUNTED ELECTRIC TOWER CRANE : 10 TON CAPACITY,MAST :31 M , JIB : 60 M , MODEL NUM : GT187 C 2.5 UPPER C.W : 20 TON , LOWER C.W : 80 TON **CODE : 004**
4. Date Crane was First put into Use		1990
5. Identification Number	(a) Maker Serial Number	SERIAL NUM : 760225
	(b) Owner distinguishing mark or number (if any)	SERIAL NUM : 760225
6. Make and type of Automatic Safe Load indicator, required		WITH OUT LOAD INDICATOR
7. Make and type of Derricking Interlock, if required		GEAR BOX
8. Date of last Previous Test of Crane		13-11-2024 BY PLS CERT NO : WQGIE-1124-41/3
9. Date of last Previous Thorough Examination of Crane		13-11-2024 BY PLS CERT NO : WQGIE-1124-41/3
10. Date of Next Thorough Examination		12-11-2025

11. **Safe Working Load or Loads**
In the case of a crane with a variable operating radius (including a crane with a derricking jib or with inter-changeable jibs of different lengths) the load at various radii of the jib trolley or crab must be given in column (ii). Test loads at various radii should be given in column (iii) and in the case of a safe working load which has been calculated without the application of a test

(i) Jib (m)	(ii) Radius (m)	(iii) Test Load (t)	(iv) Safe working load (t)	(V) Counter Weight (t)	(vi) N
60	57	2.0	2.0	20	2

12. In the case of a crane with a derricking jib or jib the maximum radius at which the jib or jib may be worked in meters — N/A

13. Defects or deficiencies noted and alterations or repairs required before putting the crane into service (if none enter (NONE)) — NONE

In Accordance with BS 7121-2003 ASME B30.5 validity of this certificate is **12 Months** from last Inspection Date

THIS IS TO CERTIFY THAT the undersigned a competent inspector did attend the above mentioned owners establishment or his designated site on **NOV 13 2024** (Date) and the items described in this report were thoroughly examined as far as possible and the above particular were correct at the time of inspection.

Signature and Stamp of PETROLEUM LIFTING SERVICES Reviewing By — MAHMOUD MORSY

TOWER CRANE INSPECTION CHECKLIST

This checklist provides the basic requirements for safe operations of a tower crane. Tower crane users should consult manufacturers, suppliers and owners on operations and safety requirements and address any concerns before using the equipment.

CERT NO : WQGIE-1124-41/3			PAGE (2)
S/N	ITEMS		REMARKS
A.General Requirements			
1	The Tower Crane is provided with markings of the safe working load, Tower crane serial number	Yes	
2	Proper and safe access and egress (with proper foot and hand holds / support) are provided to the crane operator	Yes	
3	A load capacity chart is displayed in the operator cabin .	Yes	
4	Operator crane cabin is provided with a locking mechanism so as to prevent unauthorized entry .	Yes	
5	A safety bar is fitted across the operator's cabin window where there is likelihood of the operator fallingthrough it .	Yes	
6	An approved fire extinguisher is provided in the operator cabin	Yes	
7	An Operation and maintenance log book is available in the operator cabin .	No	
8	A Manufacturer Operating Manual and maintenance Manual are made available .	Yes	
9	Crane hook is provided with a safety Latch to prevent displacement of the sling or load from the hook	NO	
10	Wire ropes are well lubricated and that there are no visible defects such as broken wires, kinks, excess wear, crushing etc .	Yes	WIRE DIA : 16 MM , N=2
B. Safety and Operational Devices			
11	A load radius indicator with warning alarm is installed	NO	
12	A jib angle indicator is provided (for luffing jib tower crane)	NO	
13	An emergency stop button, which will terminate the operation of the crane engine, is installed in the operator cabin and correctly identified	Yes	
15	Hoisting limiter to prevent over-hoisting of the hook block is functional	Yes	
16	Trolley travelling limiter to prevent over-travelling of trolley is functional	Yes

TOWER CRANE INSPECTION CHECKLIST

LEEA Development Member

This checklist provides the basic requirements for safe operations of a tower crane. Tower crane users should consult manufacturers, suppliers and owners on operations and safety requirements and address any concerns before using the equipment.

17	Limit switches to prevent over-derricking and over-lowering of jib (for luffing jib tower crane) is functional	Yes	
18	Slewing limiter to prevent overloading of crane is functional	NO	
19	Overload limiter to prevent overloading of crane is functional	Yes	
20	Load moment limiter to prevent over-turning moment is functional	Yes	
21	Anti-collision devices are tested to stop tower crane's operation such that the crane-to-crane interference must be maintained at not less than three meters	NO	
22	Wind anemometer is installed and is in good working condition	NO	
23	Adequate aircraft warning lights and /or chequered white and red flags are provided	NO	
C.Othervisual checks			
24	Load charts and other symbols are available and visible	Yes	
25	Hydraulic fluid level is sufficient	Yes	
25	Slewing oil level is sufficient	Yes	
25	All mounting bolts are in good condition	Yes	
25	Hydraulic system is free of leaks	Yes	
25	Boom sections are free of cracks or dents	Yes	
25	Main and auxiliary wire ropes are well lubricated and that there are no visible defects such as broken wires , kinks , excess wear , Crushing	Yes
